Summary

Experienced **RPA and Web Developer** with a proven track record of reducing manual effort by **70–80%** through scalable automation and robust web-based solutions. Expert at identifying automation opportunities and delivering efficient, reliable systems to streamline complex business operations.

Experience

RPA Developer and Web Developer - YKK Zipco

June 2022–Current

- Designed RPA workflows and architecture.
- Developed and deployed UiPath automation.
- Translated business requirements into automation solutions.
- Identified automation opportunities to enhance operational efficiency across departments.
- Created PDD and SDD documentation to facilitate clear understanding of automation processes.
- Conducted unit and user acceptance testing to ensure software quality.
- Monitored bot performance in production to ensure optimal functionality and reliability.
- Provided ongoing support and bug fixing.

Web Developer - SML

May 2019–May 2022

- Converted UI/UX designs into React.js applications.
- Developed RESTful APIs with Laravel and Node.js to enhance application functionality.
- Integrated third-party APIs to streamline transactions.
- Designed PostgreSQL databases.
- Maintained and debugged systems to ensure optimal performance and reliability.

Web Scraping & automation - Upwork Freelance

- Built web scraping solutions using Python and UiPath for collecting large-scale data
- Automated data extraction from dynamic websites (handling scrolling, delays, and element changes)
- Processed PDF documents (structured and semi-structured) into structured datasets
- Performed data cleaning, validation, and transformation for downstream usage
- Applied error handling, logging, and retry logic for stable automation
- Improved efficiency by minimizing manual data processing

Skills

- python, uipath, power automate
- Sql, laravel, express.js, selenium

Education

Bachelor of Science - October 2021
Information and Communication Technology,
STMIK Bani Saleh,
